

May 7, 1975

bills up there. Somebody already came down and suggested the Carpenter motion of last year, that we take all of the underlying bills and just move them carte blanche from General File to Select File. I understand the time limits. I appreciate, Mr. Speaker, what you've done. I realize your time limitations. I think that this Legislature would be criticized without end if we were to take this kind of action on this bill. It's extremely disappointing to me that this is the forced action every year of the Legislature that the membership sees a bill 24 hours before it's debated on General File, then it's hurry, hurry, rush, rush. I understand the process. I understand the strategy. I certainly am not going to accept it. I think tonight we either debate the bill here and now, or we adjourn and come back for a full debate of higher education in this state and its funding. I, for one, will not be a party to moving that bill across in that way.

SPEAKER: There is another matter that is before the House. It is very important. I would hope that we could dispose of this matter first. Chair recognizes Senator Mahoney.
